

A NEW GENERATION OF DISTRIBUTION

Maintenance Parts & Engineering Support for Quarrying, Mining & Construction Materials Plant Operators; Fleet Managers; Rental Plant & Equipment Suppliers.

Polar Star Engineering Services takes its experience in Heavy Industry from 10 years of operation in the CIS states. We worked closely together with suppliers and End Users to prove that success comes from Sector Knowledge, Customer Partnership & close Supplier Cooperation.

Vision

A New Generation of Distribution in the UAE, focused on Engineering Service, Sector Knowledge, Customer Partnerships & Close Supplier Cooperation.

Mission

To become the End User's First Choice through a focus on solutions to Customer Needs, and Sharing Profitability 3 Ways.

Values

Speed & Service through Knowledge & Teamwork

About

Established 2011 in CIS
Expertise in Mining, Metals
NTN-SNR Authorised Partners
Global Logistics functions
Warehousing JAFZA, UAE, Uzbekistan

We aim to become your preferred Spare Parts Supplier by working alongside your Engineers in Maintenance & Production; & with your Purchasing & Management teams in order to support your budgets, project plans and targets.

With our combined expertise, we can help you reduce the cost of ownership of your machines, by guaranteeing the service life of the bearings; ensuring that we make the latest technologies available to you; and ensuring that we are able to share best practice with your teams.

OUR SERVICES

Plant Audits & On-Site Assessments

Hands-on, On-Site Collaboration

Added Value Products & Best Practice

Technical Support from Suppliers

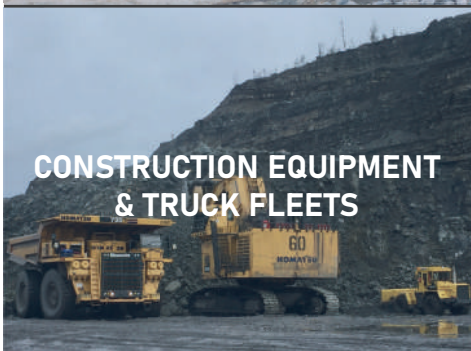

Stock Projects & Warehouse Audits

Ex-Stock Availability & Efficient Logistics

INDUSTRIES SERVED

FIND YOUR BEARINGS

PRODUCT RANGE

We are the Authorised Distributor to Industrial End Users for NTN-SNR, and so are able to offer their complete range of bearing and linear technology solutions, bearing accessories, maintenance tools and lubricants. We have the full support of the manufacturer to review your application needs, and work with your teams to drive plant efficiencies, solve maintenance issues and develop your team's bearing capabilities
